

## **Cleaning Lowrance GPS Touch Screen**

**The Lowrance Factory Web Site has a video showing how to clean the Lowrance Touch Screen. The vidios are for the new Carbon model which replaces the HDS 7. Appears to be same case with new hardware. The Lowrance web site contains more help file videos.**

**<https://www.lowrance.com/articles-and-guides/hds-carbon-video-gallery/>**

**They use a 50/50 mixture of Water & 70% Isopropyl Rubbing Alcohol in a small spray bottle.**

**They used a (New/Clean) microfiber towel to wipe the screen clean.**

**I used a 2 oz. spray bottle & distilled water. I kept the spray away from the side buttons.**

**Clean the screen not the case. This will clean the screen not repair a damaged screen.**

**Get a small bottle, a little bit of spray goes a long way. Use 70% not 90% alcohol.**

**The alcohol will evaporate if stored to long. I keep my screen cleaning microfiber towel in a separate zip lock bag.**

**Worked great.**
